

PRODUCT SPECIFICATION

STADIA X ECO

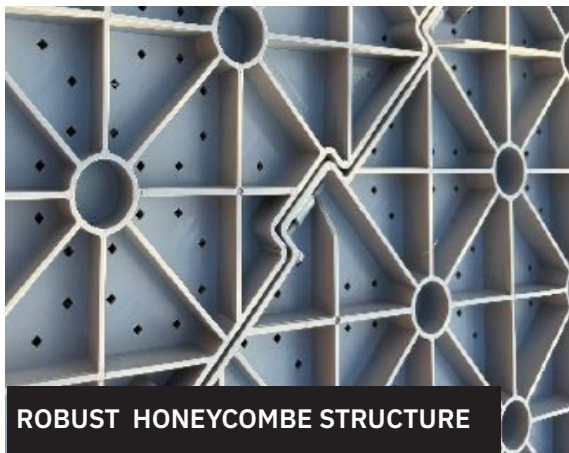

Stadia X Eco is a lightweight, pedestrian-focused flooring system designed for a variety of outdoor applications.

SELF-DRAINING ANTI-SLIP SURFACE

Ideal for walkways, marquee and military tent flooring, and temporary event spaces, Stadia X Eco provides a safe, stable surface for both foot traffic and wheelchair access while protecting the ground underneath.

With no tools required, Stadia X Eco is quick and easy to install and remove. The innovative click-in "T-peg" design ensures rapid deployment with minimal effort, while the self-draining, multi-directional anti-slip surface and edging ramps make it one of the safest pedestrian ground coverings available.

ROBUST HONEYCOMBE STRUCTURE

Stadia X Eco can also be customised in any colour, enhancing its versatility.

Material: PPCP

Ambient Temperature range: -30 to +50 °C

Panel size: 575mm x 287.5mm

Max Static Load: 50,000kg per m²

Sheet Size: 2.3m x 1.15m
or 1.15m x 1.15m

Operating Parameters:

Panel thickness: 24mm

- Self-draining. Inert and non-conductive
- Multi-directional anti-slip surface
- Resistant to solvents and non-corroding
- Resistant to UV damage
- Manually deployed and can be laid in straight runs or pads
- Deployment of up to 70m² per hour per person
- Available in a variety of colours
- Translucent panels available for sensitive grass surfaces

Panel weight: 840g (5.18kg per m²)

Suitable Surfaces: Turf, soil, sand, paving, concrete, gravel, snow, grass

*Ground dependant.
