

The Padel Noise Crisis: Time to Silence the Roar

Padel tennis is booming in the UK, but its rapid growth has a significant drawback: **noise pollution**. Winchester City Council has formally recognised "bat on ball" noise as an issue, with abatement notices expected under the Environmental Protection Act 1990. Residents describe the sound as "gunshot"-like, with one resident threatening legal action.

Across the UK, the "rifle shot" sound from padel courts is leading to rejected planning applications and increased costs for clubs. Councils nationwide are issuing formal noise abatement notices, highlighting the urgent need for solutions to this "Achilles heel of padel."

ACOUSTIC BARRIERS THAT DELIVER: PROVEN TO REDUCE SOUND BY 18-49 DB

The Box Group provides advanced acoustic barriers specifically designed to solve these noise problems.

Our barriers are engineered for superior sound suppression.

- **Quick installation** for fast event setup.
- **Customisable to fit various layouts** and can be adapted for outdoor, semi-outdoor and indoor courts.
- **Excellent sound and temperature management** for large spaces.
- **Class A** sound absorption.
- **18-49dB Rw** sound protection in different configurations.

Beyond just noise control, our barriers offer outstanding thermal insulation, helping regulate temperature control and create optimal playing conditions all year round.

They are built to last: lightweight, robust, and weatherproof with flame retardant and moisture resistant properties that ensure consistent acoustic performance regardless of weather or age.

On average, padel courts produce 66-68 decibels during normal play, with noise levels reaching 68-70 dB during peak hours

Future-Proofing Padel: Global Court Solutions

PROVEN SUCCESS AND FUTURE-PROOFING YOUR COURTS

We have over 10 years of experience in industries where sound control is critical, including construction, [live events, and the film industry \[watch video\]](#).

Real-World Success Stories: Our barriers successfully prevented Ushuaïa nightclub in Ibiza from being shut down due to noise complaints, demonstrating their effectiveness in challenging outdoor environments.
